

Notice to Nasdaq OMX Copenhagen
09/2015

A large, stylized blue bird logo, possibly a frigatebird, is positioned on the left side of the page. It has a white eye and a white beak. The bird's body is composed of several curved, overlapping shapes that suggest feathers.

INTERIM REPORT

FIRST HALF OF 2015

GER no. 80050410

INTERIM REPORT 2015 IN HEADLINES

Satisfactory interim result for 2015 at the BANK of Greenland

The first half of 2015 gave a result before value adjustments and write-downs of DKK 68.7 million, compared to DKK 70.1 million for the first half of 2014.

In the first half of 2015 the bank achieved an increase in both lending and guarantees totalling DKK 57.6 million. Despite this moderate, but still satisfactory increase, the level of lending was lower than in the same period of 2014.

The lower level of lending, together with the low level of interest rates, affecting the bank as e.g. negative interest payments on surplus liquidity at Danmarks Nationalbank, exerts pressure on net interest rates, resulting in a small decrease compared to the same period of 2014.

Fee income was at a satisfactory level, and was somewhat higher than for the same period of 2014, primarily due to remortgaging activity.

Dividend on shares, etc. fell by DKK 1.3 million compared to the same period of the previous year.

The level of the overall income from basic operations is satisfactory. There is only a small decrease, despite the continuing weak economic conditions and extremely low level of interest rates.

Total costs, including amortisation and depreciation, decreased by 2.8 million to DKK 73.1 million compared to the same period of 2014.

Value adjustments were negative in the first half-year, at DKK 3.9 million, compared to a positive amount of DKK 16.8 million for the same period of the previous year. The primary reason for the capital loss in 2015 is the bank's bond holdings.

Write-downs on loans and guarantees remain low, giving a result before tax of DKK 55.1 million, compared to DKK 78.3 million for the same period of the previous year.

- The result before tax gives a return of 13% per annum on the opening equity after dividend.
- Despite the negative level of interest rates, net interest and fee income only declined by a moderate 1.6%.
- Write-downs and provisions for the period of 0.3%.
- A decrease in total costs, including amortisation and depreciation, by DKK 2.7 million.
- Increase in lending by 1.4% in the first half of 2015.
- Solvency ratio of 18.6 and a solvency requirement of 10.5.

MANAGEMENT REVIEW FOR THE FIRST HALF OF 2015

Statement of income

Net interest income decreased by TDKK 2,780 to TDKK 101,328 in the first half of 2015, compared to the same period of 2014. The background to this decrease is the extremely low level of interest rates, a lower lending volume compared to the first half of 2014, and the negative interest on the bank's certificates of deposit at Danmarks Nationalbank. The bank's holdings of corporate bonds have, however, contributed to reducing the decrease in net interest.

Fee and commission income increased by TDKK 1,927 to TDKK 41,101 compared to the same period of 2014. The greatest increase was seen in guarantee commission, which was due to an increase in remortgaging guarantees. On the other hand, dividend payments on the bank's share portfolio decreased from TDKK 1,817 to TDKK 497.

Staff and administration costs were by and large unchanged compared to the same period of last year, at TDKK 69,710 at the end of June 2015. Staff costs increased by TDKK 1,220, which is attributable to salaries and pensions. This increase is expected and is related to an increase in the number of employees, as well as the increases under collective agreements. Other administration costs decreased by TDKK 751 and were primarily due to non-recurring costs being brought forward and posted during the first half of 2014. In the first half of 2015 the conversion of the branch in Qaqortoq commenced, as well as the head office in Nuuk on a more limited scale.

Depreciation of tangible assets, on the other hand, decreased by TDKK 3,177 to TDKK 1,988 compared to the same period of 2014.

The result before value adjustments and write-downs is thus a moderate decrease by 2%, or TDKK 1,464, to TDKK 68,671, compared to the same period of 2014.

Value adjustments represent a total capital loss of TDKK 3,868, compared to a gain of TDKK 16,757 for the same period of 2014. In 2014, the sale of shares in Nets realised TDKK 5,514. A positive capital gain on Sparinvest Holding amounting to TDKK 7,607 was also booked. In the first half of 2015, the bank's holdings of high-interest corporate bonds led to an unrealised capital loss of TDKK 7,207. During Q2 2015, the bank recognised income of TDKK 3,850 from the value adjustment of the bank's shares in Sparinvest Holding A/S.

Write-downs of loans, etc. increased by TDKK 1,208 compared to the same period last year and amounted to TDKK 9,734 at the end of the first half of 2015. Write-downs and provisions on the bank's loans and guarantees remain limited and thus reflect the continued overall strong credit standing of the bank's private and business customers in Greenland.

The profit before tax was TDKK 55,069, compared to TDKK 78,366 for the same period of 2014.

Development in operations in Q2 2015

Net interest income amounted to TDKK 50,773 in Q2 2015, which was by and large unchanged compared to Q1 2015. The very low level of interest rates and the negative interest at Danmarks Nationalbank continued to exert pressure on net interest income.

In Q2 2015, there was a small decrease in fee income by TDKK 1,559 to TDKK 19,771 compared to Q1 2015. This decrease is solely apparent from the "Other fees" item, under which the bank booked a large amount as income in Q1 2015. Guarantee commission increased, however, due to a larger volume.

Total costs decreased by TDKK 3,746 to TDKK 33,672 in Q2 2015. Holiday allowance in accordance with Greenlandic law was paid out in Q1 2015, and was the primary reason for the decrease in staff costs in Q2. For other administration costs, the decrease in Q2 was mainly related to the advertising and marketing.

MANAGEMENT REVIEW FOR THE FIRST HALF OF 2015

Depreciation of tangible assets amounted to TDKK 1,965. The increase from Q1 2015 can be attributed to the write-down of the bank's branch in Qaqortoq due to the commencement of extensive renovation work.

The result before value adjustments and write-downs is by and large unchanged at TDKK 34,124 compared to Q1 2015.

Value adjustments in Q2 2015 result in a moderate gain of TDKK 269, compared to a loss of TDKK 4,137 in Q1 2015. In Q2 the bank recognised income concerning a significant capital gain on its shareholding in Sparinvest Holding A/S. On the other hand, capital losses were incurred on the bond portfolio.

Net write-downs in Q2 2015 amount to TDKK 4,558, which is a decrease by TDKK 618 from Q1 2015. The profit before tax is TDKK 29,835 for Q2 2015, compared to TDKK 25,234 for Q1 2015.

Selected Highlights and Key Figures (not audited)

(DKK 1,000)	Q2	Q1	Q4	Q3	Q2	Q1	Q4	Q3
	2015	2015	2014	2014	2014	2014	2013	2013
Net interest and fee income	70,439	71,698	73,324	75,724	75,867	68,542	69,477	67,934
Costs, depreciation and amortisation	35,637	37,442	37,258	35,546	37,114	38,736	38,724	35,160
Other operating income	- 678	290	878	1,295	794	783	507	929
Result before value adjustments and write-downs	34,124	34,546	36,944	41,473	39,547	30,589	31,260	33,703

Profit before tax	29,835	25,234	15,881	37,186	43,727	34,639	31,044	33,831

Balance sheet and equity

The bank's lending has increased moderately by TDKK 39,332 since the end of 2014, amounting to TDKK 2,853,879 at the end of June 2015. The level of lending is thus lower than in the first half of 2014, but it is positive that lending increased during the period, after a strong decrease in lending in the second half of 2014.

The bond portfolio is by and large unchanged, at TDKK 838,260.

The bank's deposits, of which the largest element is deposits on demand, amounted to TDKK 4,206,595 at the end of the first half of 2015, having increased by TDKK 466,827 from the end of 2014. The Bank's deposit surplus remains very comfortable, but in view of the negative interest on certificates of deposit at Danmarks Nationalbank, the deposit surplus in the first half of 2015 had a negative impact on the bank's operations. The deposit volume is extraordinarily high at the end of the first half-year, however, and is expected to be reduced continuously during the next quarters.

The total balance sheet increased by TDKK 438,874 to TDKK 5,288,495. Equity amounted to TDKK 878,371 at the close of the first half of 2015.

Outside the balance sheet, the bank's guarantees and irrevocable undertakings to customers increased by TDKK 64,689 to TDKK 1,158,038 at the end of June 2015.

MANAGEMENT REVIEW FOR THE FIRST HALF OF 2015

Uncertainty of recognition and measurement

The main uncertainties concerning recognition and measurement are related to write-downs on loans, provisions on guarantees and the valuation of unlisted securities, properties and financial instruments. The management believes that the presentation of the accounts for the first half of 2015 is subject to an appropriate level of uncertainty.

Financial risks

The BANK of Greenland is exposed to various financial risks, which are managed at different levels of the organisation. The Bank's financial risks consist of:

Credit risk: Risk of loss as a consequence of debtors' or counterparties' default on actual payment obligations.

Market risk: Risk of loss as a consequence of fluctuation in the fair value of financial instruments and derivative financial instruments due to changes in market prices. The BANK of Greenland classifies three types of risk within the market risk area: interest rate risk, foreign exchange risk and share risk.

Liquidity risk: Risk of loss as a consequence of the financing costs increasing disproportionately, the risk that the Bank is prevented from maintaining the adopted business model due to a lack of financing/funding, or ultimately the risk that the Bank cannot fulfil agreed payment commitments when they fall due, as a consequence of the lack of financing/funding.

Capital requirement, risk management

The BANK of Greenland must by law have a capital base that supports the risk profile. The Bank compiles the credit and market risk according to the standard method and the operational risk according to the basic indicator method. It is still the Bank's assessment that there is no need for more sophisticated methods to be used.

In accordance with the Danish Financial Business Act the Board of Directors and the Executive Management must ensure that the BANK of Greenland has an adequate capital base. The capital requirement is the capital which, according to the management's assessment, as a minimum is needed to cover all risks.

As of 1 January, 2014, the requirements concerning equity capital, as well as the compilation of risk-weighted assets, were tightened, and in future further requirements will also be made of liquidity and gearing. Based on the Bank's solvency ratio, the BANK of Greenland is not significantly affected by the introduction of the latest new capital adequacy rules based on directives and regulations. Reference is made to the "Equity Statement" on page 13 and in Note 15.

The BANK of Greenland's reported individual capital requirement according to the 8+ model

In DKK 1,000	First half of 2015		End of 2014	
	Capital requirement	Capital requirement in %	Capital requirement	Capital requirement in %
Pillar I requirement	355,999	8.00%	325,338	8.00%
Credit risk	73,188	1.64%	62,556	1.54%
Market risk	24,676	0.56%	10,078	0.25%
Operational risk	5,500	0.12%	5,000	0.12%
Other conditions	9,163	0.21%	11,533	0.28%
Capital requirement	468,526	10.53%	414,505	10.19%

MANAGEMENT REVIEW FOR THE FIRST HALF OF 2015

The BANK of Greenland's capital ratio, excluding the result for the period and after deduction of the tax asset due to payment of dividend, stands at 18.6. At the end of 2014 the capital ratio was 20.3 and the decrease as at 30.06.2015 is mainly due to a larger short-term currency position in euro. At the beginning of July 2015 the capital ratio again stood at around 20.

At the end of the first half of 2015 the Bank's individual capital requirement was compiled at 10.5% according to the 8+ model and the Bank thus has surplus cover of 8.1% points, or TDKK 358,685.

The BANK of Greenland has published further details of the calculated capital requirement in a report on the website <http://www.banken.gl/report/>

Liquidity

Since Q1 2014, the BANK of Greenland has reported according to the new liquidity requirements (LCR) in accordance with the new capital adequacy rules, although formal compliance is not required until as from 1 October 2015, when the new rules will be phased in up to 2019. The rules have not yet been finally determined, but the preliminary calculations indicate that the Bank already fulfils the expected requirements. Based on the current requirements (Section 152 of the Danish Financial Business Act), at the end of the first half of 2015, the Bank will have excess liquidity cover of 180.9%.

The Supervisory Diamond

The BANK of Greenland has considered the benchmarks set out in the Danish Financial Supervisory Authority's Supervisory Diamond for banks. The Supervisory Diamond indicates five benchmarks for banking activities. The bank's business model states that the sum of large exposures should not exceed 100% of the capital base. The sum of large exposures constituted 68.2% at the end of the first half of 2015, of which exposures to publicly owned and sector companies constituted 20.8%.

The BANK of Greenland has property-related exposures with publicly owned companies (included in public authorities in the breakdown of the bank's loans by industry). These exposures are not included in the calculation of commercial property exposures in the Supervisory Diamond.

MANAGEMENT REVIEW FOR THE FIRST HALF OF 2015

Shareholders and dividend

The BANK of Greenland's overall financial goal is to achieve a competitive return for the shareholders.

At a price of 619 per 100 at the end of the first half of 2015, the price of the BANK of Greenland's shares has decreased from the end of 2014, when the price was 662. During Q1 2015, the Bank paid dividend to its shareholders totalling DKK 99 million, or DKK 55 per share.

In accordance with Section 28a of the Danish Companies Act, five shareholders have notified shareholdings in excess of 5%.

The Bank aims to maintain a low holding of own shares at between 0 and 3% of the share capital. The Bank may therefore in open trading windows choose to buy and sell own shares within this objective. At the end of the first half of 2015, the Bank had no holdings of own shares.

The BANK of Greenland's mission, values and corporate governance

The BANK of Greenland conducts banking activities in Greenland in open competition with domestic and foreign banks and provides advice and services in the financial field to all citizens and businesses in Greenland.

The Bank's mission should be viewed in a broader perspective whereby the BANK of Greenland can be seen as the Bank for all of Greenland. This entails an enhanced responsibility to participate positively and actively in society's development and to help to create opportunities in Greenland, while ensuring sound financial activities. The BANK of Greenland is extremely aware of this vital role.

The BANK of Greenland's values are firmly anchored in the Bank and its employees. The values are **Commitment, Room for Diversity, Decency and Competency**. These values act as a guide for how we act and want to be seen within and outside the Bank.

The BANK of Greenland considers all of the Corporate Governance recommendations and the Danish Executive Order on Management and Control of Banks, etc. and it is the Bank's objective to observe these recommendations at all times and to the greatest possible extent. The Bank's Corporate Governance Statement may be found on the Bank's website www.banken.gl

The BANK of Greenland has endorsed the UN Global Compact, which has ten principles for ethical conduct. The BANK of Greenland publishes its report every year. This is available on the Bank's website.

Outlook for 2015

After probably three years of negative GDP development in Greenland, the Bank still expects zero GDP growth in 2015. Based especially on an expected increase in construction activity, which will notably affect the Bank's customers, the Bank does, however, expect satisfactory operations.

The BANK of Greenland continues to expect a moderate increase in lending during the year, guarantees at a high level, and an unchanged to slightly falling interest rate margin. There is still considerable uncertainty related to the extremely low level of interest rates, including for how much longer the rate of interest on certificates of deposit at Danmarks Nationalbank will be negative. On this basis the Bank expects a slight decrease in overall income compared to 2014.

Total costs including amortisation and depreciation are still expected to show a slight increase by approximately 1% in relation to 2014. This is based on the expectation that all positions will continue to be filled, and that the planned renovation and maintenance of some of the Bank's staff accommodation will be completed. Conversion of the head office in Nuuk has commenced and the planned renovation of the branch in Qaqortoq

MANAGEMENT REVIEW FOR THE FIRST HALF OF 2015

was begun in Q2 2015.

A result before value adjustments and write-downs at the level of DKK 125-145 million, compared to DKK 148 million in 2014, is still expected.

The bank assesses that the quality of the lending portfolio is satisfactory. Value adjustment of lending at a moderate level is therefore expected in 2015, and probably slightly lower than in 2014.

NOTES

Note 1

Applied accounting policies etc.

The interim report has been prepared in accordance with the Danish Financial Business Act, the statutory order on financial reports for credit institutions and investment service companies, etc. and the Danish disclosure requirements for the interim reports of listed financial companies.

The applied accounting policies are unchanged compared to the annual report for 2014.

This interim report is presented in accordance with the going concern principle, based on current practice and interpretation of the rules for Danish banking institutions.

Tax, which consists of current tax and changes in deferred tax, is recognised in the income statement when it relates to the result for the period, and directly to equity when it relates to items recognised directly in equity.

On calculating the taxable income, Greenland allows tax deduction of dividends for the dividend-paying company. The tax value of this is therefore added to equity at the time of the Annual General Meeting's approval of the dividend.

Deferred tax assets are recognised in the balance sheet at the value at which the asset is expected to be realised.

The interim report has not been audited or reviewed.

Note 2

Significant accounting estimates

Calculation of the accounting value of certain assets and liabilities is related to an estimate of how future events will affect the value of these assets and liabilities. The most significant estimates relate to write-downs on loans, provisions for guarantees, determination of the fair value of unlisted financial instruments and valuation of domicile properties, as well as to provisions.

The estimates are based on assumptions that the management considers reasonable, but which are uncertain. In addition, the Bank is subject to risks and uncertainties that may lead the actual results to deviate from the estimates.

For write-downs of loans there are significant estimates associated with the quantification of the risks that not all future payments will be received. Furthermore, collective write-downs and the determination of the management reserve in write-downs remains uncertain.

Listed financial instruments may be priced in markets with low turnover, which means that the use of the stock exchange prices when measuring fair value may be subject to some uncertainty.

Unlisted financial instruments which involve significant estimates in connection with the measurement of fair value.

For provisions, there are significant estimates related to the determination of the future rate of employee turnover, as well as determining the interest commitment on tax-free savings accounts.

Evaluation of the Bank's domicile properties is also subject to significant estimates.

MANAGEMENT STATEMENT

The Board of Directors and Executive Management have today considered and approved the interim report for the period from 1 January 1 to 30 June 2015, for the public limited liability company, GrønlandsBANKEN A/S.

The interim report was prepared in accordance with the Danish Financial Business Act, and the management review was drawn up in accordance with the Danish Financial Business Act. The interim report was furthermore prepared in accordance with additional Danish disclosure requirements for listed financial companies.

It is our opinion that the interim report gives a true and fair view of the bank's assets, liabilities and financial position as at 30 June 2015, and of the result of the Banks activities in the first half of 2015.

The management review gives a true and fair review of the development in the bank's activities and financial affairs, as well as a description of the significant risks and uncertainties that the BANK of Greenland faces.

12 August 2015
